CONTEMPORARY PHYSICS

a review of physics and its applications

Editor
Professor J. S. Dugdale — Leeds

Reviews
Dr P. L. Knight — London

Editorial Board
Professor E. J. Burge — London
Dr P. F. Chester — Leatherhead
Professor B. R. Coles — London
Professor Sir Charles Frank, OBE, FRS — Bristol
Sir John Mason, CB, FRS — London
Dr M. V. Nevitt — Argonne
Professor Sir Rudolf Peierls, CBE, FRS — Oxford
Professor C. J. Pethick — Urbana
Professor M. J. Rees, FRS — Cambridge
Professor G. W. Series, FRS — Oxford
Sir Arthur Vick, OBE — Warwick

Consultant Editors
Professor P. G. de Gennes — Paris
Professor R. Kaischew — Sofia
Professor Sir Nevill Mott, FRS — Cambridge

VOLUME 27

JANUARY to DECEMBER 1986

Taylor & Francis
London • New York • Philadelphia

Contents of Volume 27 (1–6)

Volume 27 Number 1 Jan/Feb 1986

3 Curved space and amorphous structures
Part II. Gauge theories
G. Venkataraman and D. Sahoo

37 Charge-density wave transport
J. C. Gill

Essay reviews

61 The physics of the violin
J. Woodhouse

63 Hot electrons in semiconductors
M. J. Kelly

68 Book reviews

87 Books received

Volume 27 Number 2 Mar/April 1986

91 Hypernuclei
D. H. Davis and J. Pniewski

117 The thermal conductivity of insulators and semiconductors
J. W. Vandersande and C. Wood

145 The mechanical properties of the dislocation core
M. S. Duesbery

Essay reviews

169 Physics of dense matter
J. M. Irvine

173 One-dimensional compounds
A. D. Yoffe

176 Book reviews

197 Books received

Volume 27 Number 3 May/June 1986

203 Photoelectron diffraction and surface science
Y. Margoninski

241 Ion implantation—an introduction
P. D. Townsend

Essay reviews

257 Entropy in relation to complete knowledge
P. W. Atkins

261 Diffusion in crystalline solids
B. Tuck

265 Book reviews

285 Books received

Volume 27 Number 4 July/Aug 1986

291 Discovery of the W and Z bosons
P. M. Watkins

325 The universe—present, past and future
M. S. Longair

345 Neutron interferometric tests of quantum mechanics
H. Rauch

Essay reviews

361 Distances in space
R. C. Smith

363 Grand unified theories
J. C. Taylor

367 Book reviews

389 Books received

Volume 27 Number 5 Sept/Oct 1986

395 The electron–hole liquid in semiconductors
L. V. Keldysh

429 Hole-mediated stability and permeability of bilayers
D. Exerowa and D. Kashchiev

463 Numerical weather prediction
B. J. Mason

Essay review

473 Polycrystalline semiconductors
G. J. Russell

479 Book reviews

493 Books received

Volume 27 Number 6 Nov/Dec 1986

499 Uses of radar in meteorology
K. A. Browning

519 Premelting
W. Hayes

533 Digital fluoroscopy: a new development in medical imaging
K. P. Maher and J. F. Malone

Essay reviews

553 Quantum theory of finite systems
R. F. Bishop

557 Quarks and leptons: the new elementary particles?
D. C. Colley

561 Book reviews

593 Books received

AUTHOR INDEX (Vol. XXVII)

ATKINS, P. W., Essay review, Entropy in relation to complete knowledge (see erratum p. 491) 257
BISHOP, R. F., Essay review, Quantum theory of finite systems 553
BROWNING, K. A., Uses of radar in meteorology 499
COLLEY, D. C., Essay review, Quarks and leptons: the new elementary particles? 557
DAVIS, D. H., and PNIEWSKI, J., Hypernuclei 91
DUESBURY, M. S., The mechanical properties of the dislocation core 145
EXEROWA, D., and KASHCHIEV, D., Hole-mediated stability and permeability of bilayers 429
GILL, J. C., Charge-density wave transport 37
HAYES, W., Premelting 519
IRVINE, J. M., Essay review, Physics of dense matter 169
KASHCHIEV, D., *see* EXEROWA, D.
KELDYSH, L. V., The electron–hole liquid in semiconductors 395
KELLY, M. J., Essay review, Hot electrons in semiconductors 63
LONGAIR, M. S., The universe—present, past and future 325
MAHER, K. P., and MALONE, J. F., Digital fluoroscopy: a new development in medical imaging 533
MALONE, J. F., *see* MAHER, K. P.
MASON, B. J., Numerical weather prediction 463
MARGONINSKI, Y., Photoelectron diffraction and surface science 203
PNIEWSKI, J., *see* DAVIS, D. H.
RAUCH, H., Neutron interferometric tests of quantum mechanics 345
RUSSELL, G. J., Essay review, Polycrystalline semiconductors 473
SAHOO, D., *see* VENKATARAMAN, G.
SMITH, R. C., Essay review, Distances in space 361
TAYLOR, J. C., Essay review, Grand unified theories 363
TOWNSEND, P. D., Ion implantation—an introduction 241
TUCK, B., Essay review, Diffusion in crystalline solids 261
VANDERSANDE, J. W., and WOOD, C., The thermal conductivity of insulators and semiconductors 117
VENKATARAMAN, G., and SAHOO, D., Curved space and amorphous structures. Part II: Gauge theories 3
WATKINS, P. M., Discovery of the W and Z bosons 291
WOOD, C., *see* VANDERSANDE, J. W.
WOODHOUSE, J., Essay review, The physics of the violin 61
YOFFE, A. D., Essay review, One-dimensional compounds 173
